

Due to Safety Concerns for our Customers & Employees

We no Longer Fill ANY PRE-1990 Aluminum Cylinders

On January 6th, 2013 following Eddy Current Testing, an Aluminum Tank that just passed Eddy Testing (Check for Neck Cracks) had a Catastrophic Failure during Hydro-Testing at our Facility.

Though Hydro-Testing is a very Safe Process - had the Tank NOT been due for Hydro and went directly to Fill

- Lives may have been lost -

Pacific Wilderness has conducted Eddy Testing for more than 10 years as a service to our Customers - even though

OTHER SHOPS STOPPED FILLING PRE-1990 TANKS YEARS AGO

Since this incident - Pacific Wilderness has changed Policy:
Due to Safety Concerns for our Employees & Customers
We will no longer fill ANY Pre-1990 Aluminum Cylinders
